

Monthly e-Update

NEW BOSCH PHOTO BEAMS IN STOCK NOW

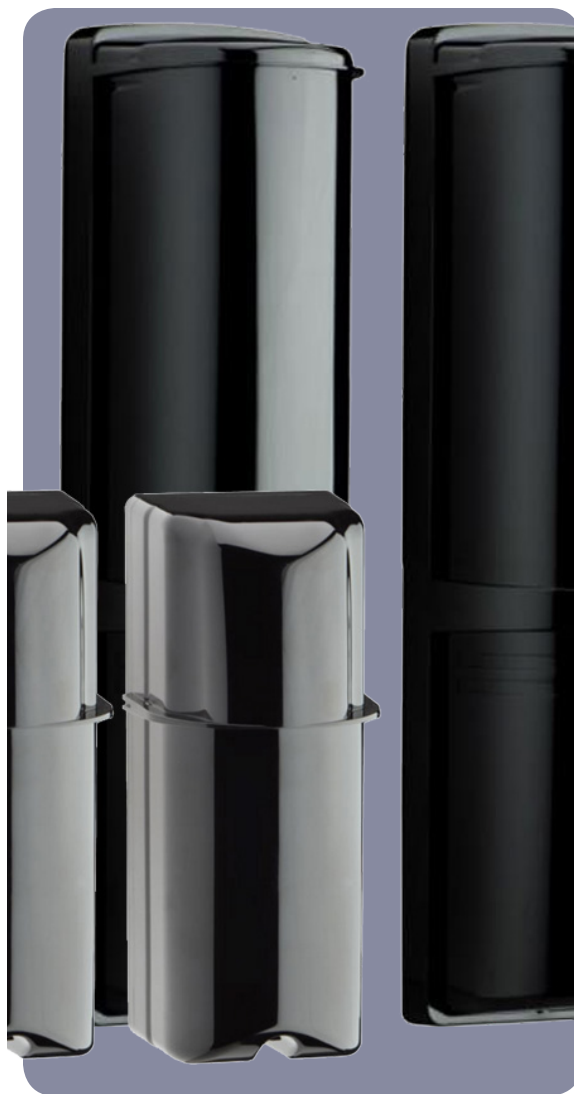

The latest offering from Bosch. A new range of commercial grade Point to Point Beams.....

Bosch has just released a new family of photo beam detectors. Photobeam 3000 and Photobeam 5000 offer a range of single channel dual beam, single channel quad beam, and 4-channel quad beam models for both indoor and outdoor use.

The new family of Bosch photo beam detectors suits a variety of applications with a maximum range of 400m (indoor)/200m (outdoor) for the quad beam models and 180m (indoor)/90m (outdoor) for the dual beam models.

These great new photo beam detectors provide improved ease of installation and reliability, thanks to a number of features:

- Built-in alignment optics with easily accessible volt meter test terminals.
- Improved mounting and cover screw locations.
- A larger and more accessible wire entry point.
- Channels to prevent water and dirt from accumulating in front of the optics, eliminating the need for additional weatherproofing solutions.
- Foam seals on both the mounting plate and housing, protecting against drafts and insects.
- Field adjustable Beam Power Control (5000 series) which reduces cross talk and reflections.

Technology Roadshow Success

A big thank you to everyone who took time out of their busy schedule to look at the latest

willing to look at products they have not previously installed. A great way to ensure you are aware of what product solutions you can offer your customers.

The range of products demonstrated included:

- Bosch 3000 Touchscreen V2 with intercom APP.
- Bosch 6000 MyAlarm service
- UNV Plug n play CCTV Products

If you missed out, do not worry. We will be running regular roadshows throughout the year. In the meantime keep up to date by reviewing our website regularly: www.csproducts.co.nz

Tech Corner

BOSCH B426 Tutorial

Our Solution 3000 controller has been a huge success. One of the benefits of the 3000 controller is the high level integration of broadband communications.

With an increasing number of premises using naked broadband (non traditional phone line), the B426 Bosch IP module is perfect for these situations.

With the added functionality of remote upload, and smartphone APP's the B426 is becoming increasingly popular.

If you have never used the B426 module, then we recommend you take a Solution 3000 training course (check out the training center on our website for training dates). There are also 2 other important pre-requisites

1. A DLA Module - This makes programming the B426 IP Module a breeze. We strongly advise against attempting to program the module without it.

2. Watch the YouTube video on programming the B426 module. Check out the link here: <https://www.youtube.com/watch?v=6gVTj0DAyuA>

UNV Training Courses

We are pleased to announce the addition of UNV (Uniview) CCTV to our certified training courses being offered monthly in Auckland, Wellington, & Christchurch, and regularly in other centres throughout New Zealand.

To receive support on UNV we require all technicians to undergo training. This ensures UNV installers offer the highest level of expertise and product configuration to get the most out of this fantastic product.

Please visit our website and click on our Training Centre link and register for the next UNV training in your area.

Tech Support Update

In order to provide a more efficient customer service experience to our customers, we will be implementing an automated voice answer system which will allow you to go directly thru to Tech Support.

Please note the following points:

- If all our technicians are busy, then please leave a message on the voicemail. Tech messages are given priority over incoming calls, so don't be afraid to leave a message!
- Have the correct Installation manual at hand when calling.
- Only call when on-site and can access the product.
- If you are wanting to confirm features, then our sales team will be happy to help.
- If it is not urgent, please email us on: Support@csproducts.co.nz
